

Enhanced Solid Waste and Recycling Services In the City of Big Bear Lake

The City of Big Bear Lake and Big Bear Disposal, Inc. are pleased to announce the Enhanced Residential Solid Waste and Recycling Programs that will be rolling out in July 2023. As a part of the City's compliance efforts with State Legislation (SB-1383) and the new Franchise Agreement with Big Bear Disposal, Inc., there are significant improvements to the residential programs that will include cart service, automation, and new trucks! Beginning in the middle of June, all residential properties will receive new 96-Gallon carts for solid waste (trash) and recycling. The trash carts will be gray and will be used as typical trash receptacles to accept all non-recyclable solid waste including food waste. The new recycle containers will be used consistent with previous practices for recycling.

The one exception to the solid waste carts will be green waste (pine needles, lawn clippings, yard debris) which now must be collected separate from usual trash pursuant to SB-1383. Big Bear Disposal, Inc. will provide two (2) options for the collection of green / organic waste. Customers can contact Big Bear Disposal, Inc. to request an optional green waste cart at no additional cost. Additionally, residential customers may continue to place bagged green waste out at the curb on their collection day (limited to 5 per week).

The carts will be delivered beginning the week of June 15 with the new service scheduled to begin the week of July 3. Collection routes and days will not change from the existing schedule. Simply roll your carts wheels to the curb to experience the new automated collection. As a part of these programs and services, Big Bear Disposal, Inc. will offer additional optional enhancements such as 64 gallon carts for trash and recycling, pull out service, or additional carts to enhance capacity. Reach out to us for further information and pricing.

Please see the flyers and forms included within this packet to learn more about the enhanced programs and services.
